## Product Description

□

### Product Description:

The SPC Wall Panel product is available in a standard size of 600mm\*2440mm, but can also be customized to fit your specific needs. The length of the panel can be extended up to 3000mm. This makes it an ideal product for both residential and commercial projects, as it can be used for large-scale installations without the need for additional panels.

One of the key features of the SPC Wall Panel product is its Unilin Lock installation system, which makes it very easy to install. This system ensures a secure and stable fit, even in high-traffic areas. The installation process is quick and simple, which means that you can have your SPC Wall Panels installed in no time.

Another important feature of the SPC Wall Panel product is its fire resistance. It has been classified as Class B1, which means that it has a high level of fire resistance. This makes it a safe and reliable product for use in a variety of settings, including residential and commercial spaces.

In summary, the SPC Wall Panel product is an innovative and versatile product that can be used for a variety of interior design applications. Its unique combination of natural stone and plastic gives it exceptional durability and strength, making it an ideal product for both residential and commercial projects. Its Unilin Lock installation system makes it easy to install, while its high level of fire resistance and overall wear layer provide added safety and durability. If you're looking for a high-quality and reliable wall panel product, the SPC Wall Panel is an excellent choice.

Thickness	4-8mm
Size	600*3000mm(Length is customisable)
Fire Rating	B1

### Features:

Advantages of stone crystal wall panel products: time-saving fast installation + money saving

The introduction of international advanced manufacturing equipment and locking technology, simplify the installation process, shorten the decoration time, construction without shovelling the wall, reduce rubbish removal, installation without sand and cement, fast delivery, ready to use. Can replace tiles, marble, can save 50% of the cost.

Waterproof: SPC imitation porcelain wall panel material has the property of stable and not afraid of water, waterproof, moisture-proof and mould-proof.

Fireproof: the wall panel material itself is composed of natural stone powder and polymer crystal material, fire performance reaches the national B1 level standard.

Environmental protection "0" formaldehyde: the product adopts natural stone powder as raw material, after high temperature and high pressure moulding, the whole production process does not need any (glue) adhesive, 100% 0 formaldehyde added. Red Shannon is the first one to get the zero formaldehyde test from the national testing group.

Quality light + not easy to fall off: relative to tiles or stone, SPC porcelain wall panels are lighter in quality, larger specifications, more integrated, not easy to appear local drumming and shedding problems.

Sturdy and scratch-resistant: The surface of the wall panel has a strong scratch-resistant layer, more sturdy and scratch-resistant, can also be used as flooring.

Creativity: Wall panels have high plasticity and can be customized according to the requirements of designers and customers, with any colour pattern, creative texture and surface texture.

Installation: Wall panels can be glued and fixed at the back. The corners of yin and Yang can be folded, and can also do seam treatment!

Installation integration, wall panels can be bent inside and outside, yin and yang corners are not restricted, without additional accessories, showing the beauty of simplicity.
