Product Description

Carbon Crystal Board Simulation Waterproof Marble Wood Veneer Wall Panel

Carbon Crystal Slab Marble Wood Veneer Wall Panel combines multiple functions to create a unique and versatile decorative option for interior walls. Carbon crystalline panels, a material known for its excellent thermal conductivity and energy-saving properties, provide warmth and comfort to spaces. This feature is especially useful in cold climates or during winter. The waterproof feature of the wall panel ensures that it resists water damage, making it suitable for areas prone to moisture or moisture, such as bathrooms or kitchens. It helps prevent problems like warping, swelling or mold growth. The simulation of marble wall panels refers to its ability to imitate the appearance of real marble. Designed to replicate the natural patterns, textures and colors of marble, these panels offer a realistic and visually appealing alternative. The interior of the wood veneer is composed of new material carbon crystal panels, which makes the panels have the advantages and characteristics of bamboo charcoal, while being more stable and cost-effective compared to solid wood.
